

1     Q.     Re: Refurbishment of the Fuel Oil Storage Facility

2           Is the manual fuel reconciliations part of the ongoing daily maintenance required at  
3           the Holyrood Thermal Generating Station?

4

5

6     A.     Fuel reconciliation is a requirement from the Provincial Gas and Regulated Products  
7           (GAP) regulations to ensure that all oil leaving the storage tanks is accounted for in  
8           the combustion process. In this manner, underground leaks (i.e. through the tank  
9           floor) can be detected. Please refer to the response to CA-NLH-4 for the schedule  
10          of reconciliation.
