

1 Q. Re: Data: Please identify each historical value by account by year that the
2 Company considered to be atypical or abnormal. Further, specifically state the
3 treatment afforded such data in the determination of life or salvage parameters, by
4 account, along with the basis for the manner in which the data was treated. Finally,
5 provide all support and justification for determining why each value was atypical or
6 abnormal.

7
8
9 A. There were no transactions that were considered as outlier transactions in the data
10 provided in response to CA-NLH-1.
