

1 Q. Re: Life: Please provide all support and justification for each placement and  
2 experience band employed for actuarial analysis. If only one band was performed,  
3 provide all support and justification for such action.  
4  
5

6 A. Hydro provided retirement history from 1991 to 2009 in response to CA-NLH-1. The  
7 records prior to 1991 were not available in an electronic format. In the view of  
8 Gannett Fleming this 19 year period provides a sufficient history from which  
9 retirement trends can be determined. As such, all accounts were analyzed using a  
10 1991-2009 experience band. The placement band used was the period from the  
11 year of the installation of the oldest asset to the end of the study period (2009).
