

1 Q. Re: Net Salvage: Does the Company receive any amount from government entities  
2 when it is requested to relocate plant due to street widening or other relocation  
3 requirements? To the extent the Company does receive any such funds, provide the  
4 specific accounting employed by the Company and the basis for such treatment  
5 (e.g., booked to the reserve, booked as a credit to plant, etc). Finally, provide the  
6 amount received, by year, for the past 10 years, segregated into plant accounts  
7 pertaining to the plant either added or retired in association with the relocation.

8

9

10 A. Hydro has received amounts from government entities when it is requested to  
11 relocate plant due to street widening or other relocation requirements. Please see  
12 the response to CA-NLH-36 since the accounting employed by Hydro would be the  
13 same. The amount received by year, for the past ten years, is shown in CA-NLH-38  
14 Attachment 1. All of the amounts received except for the last one pertain to service  
15 extensions and distribution upgrading. Service extensions and distribution  
16 upgrading projects would result in costs primarily allocated between poles (P07),  
17 transformers (T07), street lights (S14) and pole hardware (P04).

18

19 The final entry pertains to the relocation of TL-227 and TL-263 in Daniel's Harbour  
20 resulting in \$335,301 credited to pole structures – wood (P05) and \$111,767  
21 credited to conductor – transmission (C13).

Amounts received from Government Entities for Relocation Requests 2000-2009

Year	Description	Amount \$	Customer Name	Explanation/Remark
