
1 Q. Re: Production Net Salvage: Please state the Company's intention for the plant site
2 (i.e., the land) if and when the Company retires a generating unit and demolishes
3 the facility. In other words, does the Company plan on retaining it for future
4 generating station, selling the land, or simply letting it sit idle. Further, provide all
5 support and justification for the position taken in the Company's response.

6

7

8 A. Hydro has no current plans to retire any of its generating units and demolish the
9 facility. If and when such an event occurs, Hydro would consider the possibilities as
10 they relate to a particular site, giving first consideration to its mandate to provide
11 safe, reliable, least-cost power and whether the site could and should be best used
12 for that mandate.
