

1 Q. Re: Account R12: Please provide a detailed description of the various assets and
2 corresponding cost of each set forth in Account R12 – Right-Of-Ways, including all
3 information and documentation the Company believes is significant or meaningful
4 to the determination of life characteristics. Further, provide all reasons and
5 justification, including all documents that support any position that an average
6 service life greater than 55 years (e.g., 65 or 75 years) is not appropriate. Finally,
7 specifically address which of the Right-Of-Ways are perpetual and which have a
8 specific expiration date, identifying both the installation date, corresponding cost,
9 and expiration date.

10

11

12 A. Please see CA-NLH-114 Attachment 1. This account was analyzed in total, rather
13 than on an asset by asset basis, and the asset specific data was therefore not a
14 consideration. However, Hydro provides the following additional information on
15 Right of Ways (ROWs) for transmission lines, distribution lines and service drops.

16

17 Transmission Lines

18 Hydro has title by way of Orders in Council, Crown Land Leases and through
19 purchase of private property. The Order in Councils were mainly for Bay d'Espoir
20 Phase I and II projects that saw the installation of transmission lines to provide
21 power to the major centres in the Province. Transmission lines ROWs subsequent
22 to this time were by way of leases in the form of an easement from Crown Lands
23 that are for a 50 year term. Hydro can renew them after 50 years. For these ROWs
24 Hydro pays a fee to the Province based on the number of square meters or
25 hectares. In addition to Order in Councils and Leases, ROWs are also acquired
26 through purchase of private property. The number of pieces of private property
27 purchased vary from line to line based on the location and is dependent on whether

1 the line crosses private property. If the owner of the private property refuses to
2 sell, Hydro has expropriated the land and paid the owner the required fee as per
3 legislation in order to obtain title.

4 5 Distribution Lines and Service Drops

6 The same process for distribution lines is followed as for transmission lines
7 regarding Crown Land with a lease that is for a 50 year term and is renewable. If
8 ROWs cross private property, an easement is often obtained from the owner for a
9 nominal fee for the life of the line and there is no annual fee. For service drops,
10 Hydro is often crossing private property to provide service to residents and general
11 service customers and easements are obtained from the owners.

12
13 Please refer to CA-NLH-116 for a discussion of information that the Company
14 believes is significant or meaningful in determining life characteristics and for an
15 explanation of why a life of not longer than 55 years was not appropriate.

Below is a list of all assets in account R12 - Right-Of-Ways that were included in the data list used for Gannett's depreciation study.
