

1 Q. [Account R14 - Routers & LAN] - As it relates to investment in Account R14 - Routers
2 & LAN, the Company states in CA-NLH-119 that due to the small dollar values
3 associated with plant balances in this account, plant older than 5 years of age
4 should have been retired but a retirement work order has not been issued. At this
5 time, please confirm that all investment in Nordix LAN wiring installed in 2001 has
6 actually been physically retired. Further, specifically confirm that the investment in
7 IBM tape libraries have actually been physically retired including the 3584 tape
8 library placed in service on December 31, 2003. Finally, provide all documents that
9 support the Company's belief that such investments have actually been physically
10 removed from service and should have been retired.

12

13 A. The investment in Nordix LAN wiring installed in 2001 is still in service and has not
14 been retired. The investment in IBM tape libraries is also in service, however two
15 storage tape libraries and a tape backup unit installed in 2006 are to be replaced
16 and retired in 2012.
