

1 Q. [Operational Personnel] - Please provide the underlying support and justification for  
2 each agreement or disagreement by operational personnel with the preliminary life  
3 estimates submitted by Gannett Fleming. The response should provide all  
4 underlying analyses performed or reviewed by each separate and identified  
5 operational person by account. The response should also identify the range around  
6 the point estimate ultimately determined and the level of confidence in both the  
7 range and point estimate by account along with all supporting documentation.

8

9

10 A. The operations staff were involved in the average service life selection process in  
11 two ways:

- 12 • Operations interviews were conducted prior to the development of the  
13 preliminary life estimates. The notes from these interviews have been included  
14 in response to RFI CA-NLH-12; and
- 15 • After the development of the preliminary life estimates, the estimates were  
16 distributed to the operations staff to confirm the reasonableness of the  
17 estimates. Any changes that resulted from this review of the life estimates were  
18 summarized in the response to RFI CA-NLH-19.

19

20 The operations staff did not provide any other direct material or opinion other than  
21 that provided in response to previous RFI's.
