

1 Q. With reference to the discussion in the 2011 Study of the Holyrood Thermal
2 Generation Plant (at pages II-32 and 33), if these assets are expected to retire in
3 2020, will the related investments be fully recovered? If no, please indicate the
4 unrecovered costs that will exist at retirement. Provide the calculations of the
5 unrecovered costs. How does Hydro plan to recover these unrecovered costs?
6
7

8 A. When the Holyrood generation assets, other than those used to support the
9 synchronous condenser function, retire in 2020, the related investments will be
10 fully recovered.
