
1 Q. With reference to Account A04 - Auxiliary Power Systems [page IV-6 of Exhibit 1],
2 considering that there have only been two retirements in the 42 years of data
3 shown, please explain why statistical analysis used to develop a curve shape should
4 be considered valid support.

5

6

7 A. Please refer to CA-NLH-19. As indicated in the response to CA-NLH-19, the results
8 of the retirement rate analysis were only one of a number of considerations
9 reviewed in the development of the average service life estimate.
