

Undertaking 129

GT-CA-NLH-005. Explanations for differences between scoring of Pro Energy and PW Power Systems on the following items:

SP12 (Undertake to provide explanation as to the comment "Building has been excluded from the execution plan, but the allowance was carried" in the PW Power Systems Column.)

SP12 (building allowance) PW Power Systems did not include the building construction in the execution plan that was presented with their tender. Instead PW Power Systems indicated the building scope as being optional and contingent on contract award. As the building was not an optional item in the tender specification, PW Power Systems was assigned a score of 0 for this item.
