

1 Q. (RSP Application, PUB-NLH-17) What does Hydro conclude from the analysis
2 undertaken in response to PUB-NLH-17?

3

4

5 A. Hydro's conclusion from the analysis undertaken in response to PUB-NLH-17 is
6 further illustrated by the response to V-NLH-5. That is, its proposal to allocate the
7 net RSP load variation based on customer energy ratios is clearly consistent with
8 the approved Cost of Service methodology of sharing such fuel related costs.
