

1 Q. Application, Schedule B, page RSP-10 to RSP-12, section 2.2, Hydro states, in the
2 section dealing with Teck Resources:
3 "Note: Once new base rates are approved based on Hydro's 2013 Test Year, Hydro
4 will apply for the disposition of any differences between the adjustment amounts
5 calculated and the adjustment which would have been calculated using the 2013
6 approved Test Year rates. The difference will be refunded to, or collected from,
7 Teck Resources, in a manner to be approved by the Board."

8
9 Since this Note is found only in the section relating to Teck Resources, does this
10 mean that any difference in revenue resulting from approved rates to the other
11 Industrial Customers that are different from those submitted in the General Rate
12 Application will not be refunded to, or collected from, the other Industrial
13 Customers?

14
15
16 A. In the case of the Industrial Customers, excluding Teck Resources, the September 1,
17 2013 rates have been set by the Order in Council and will not require adjustment.
18 Hydro has assumed that new base rates will be approved prior to September 1,
19 2014, therefore there will be no impact resulting from approved rates which differ
20 from those proposed.
