

1 Q. Has Hydro determined the earliest time the permanent installation of T2 could
2 occur?

3

4

5 A. Hydro has not yet determined the earliest time in which T2 will be permanently
6 installed in the Wabush Substation. This will become clearer once Hydro conducts
7 a full system review on the Wabush System, which is expected to be completed in
8 the first half of 2015. Future load growth and the current condition of equipment in
9 Wabush will be key factors in determining the schedule of this work.
