

1 Q. On page 5 of Hydro's *Replacement of Equipment Resulting from Sunnyside T1*
2 *Transformer*, it is stated that:
3 *"However, it must be noted that a fault on Sunnyside T4 would still require*
4 *operation of five circuit breakers to isolate the transformer."*

5 Has Hydro tested the operation of the Sunnyside T4 transformer protection and
6 control system since the January 2-8, 2014 electrical system events? If so, what
7 were the results?

8
9
10 A. Hydro has not yet completed testing of T4 transformer protection and control
11 system, but will complete this testing during a scheduled T4 outage planned for July
12 22, 2014.
