

1 Q. How much engineering has been completed to date and is there any cost
2 adjustment required since the application was filed.

3

4

5 A. Additional detailed engineering has not been carried out since the application was
6 filed. The engineering to date, used to generate the estimate, is based on Hydro's
7 experience in the area, including known access infrastructure and routing,
8 confirmation of loading conditions based on weather events since 1966, and
9 current Hydro design standards.

10

11 There has been no cost adjustment required since the application has been filed, as
12 Hydro is expecting to commence detailed engineering once the Board's approval is
13 obtained.
