

1 Q. Reference: Volume I, 2014 Capital Plan, Page 2
2 *“Expenditures for new generation and transmission assets are included in these*
3 *estimates, specifically for the upgrade of the transmission line corridor between*
4 *Bay d’Espoir and Western Avalon and the addition of a new combustion turbine at*
5 *Holyrood. These projects will be the subject of a separate filing.”*

6 Why has Hydro not filed these projects with the Application and when does Hydro
7 anticipate filing these projects with the Board?

8
9
10 A. Given the magnitude of the capital expenditures for the Bay d’Espoir to Western
11 Avalon 230 kV transmission line addition and the new combustion turbine at
12 Holyrood when compared to the total capital expenditure of the remaining 2014
13 capital budget projects, Hydro was of the opinion that these two projects should be
14 considered separately from the normal capital budget application. For this reason,
15 Hydro intends to submit these projects to the Board within the next several weeks.
