

1 Q. C-8; Volume I, Tab 3: Upgrade Burnt Dam Spillway Structure – Bay D’Espoir, page  
2 4: Hydro states that: *“Most of work to be completed during this project will*  
3 *address deficiencies with the power supply systems that were outside the scope of*  
4 *Hatch’s mandate but are necessary to achieve the overall reliable operation of*  
5 *Burnt Spillway as assessed by Hatch.”*

6 Please provide all reports, either internal or external, addressing the current  
7 condition of plant and justifying each aspect of the project.

8

9

10 A. There are no additional reports, either internal or external, addressing the current  
11 condition of plant and justifying each aspect of the project.
