

1 Q. **Project: Holyrood – Add Nominal 60 MW Gas Turbine – \$99,444,600**

2 Page A8 of the Application indicates a capital plan project of nearly \$100 million to
3 add a 60 mW gas turbine.

4 a) When the Muskrat Falls generating station is in full operation, will this
5 turbine be required to maintain the loss of load hours (LOLH) below the 2.8
6 criteria?

7 b) Please summarize all discussions that Hydro has had with industrial and
8 other customers to determine if all or part of this capex can be eliminated
9 through the use of interruptible power contracts.

10

11

12 A. No project proposal has yet been submitted for this project. Hydro will respond to
13 requests for information on this matter after submission of the proposal.
