

1 Q. **Project: Bishop Falls – Purchase Track Mounted Backyard Radial Boom Derrick –**
2 **\$158,700**

3 As the justification for the purchase and the listed uses are all for rural areas, please
4 confirm that this capex is allocated solely to interconnected rural customer class.

5

6

7 A. This unit will be used throughout Newfoundland and Labrador to service customers
8 where access to the grid is restricted by fencing or other similar barriers. It could be
9 used in any location if the need arises. This asset is allocated across all systems.

10 General plant such as this is prorated to functions and classifications based upon
11 the Cost of Service subtotal of production, transmission, distribution, and
12 accounting expenses. It is not, therefore, solely assigned to the rural rate classes.
