

1 Q. **Evidence - Application for Deferral and Recovery of 2014 Capacity-Related Supply**
2 **Costs, page 4, lines 2-4.**

3 Please confirm that capacity constraints experienced in the winter of 2013-2014
4 were as a result of either, or both, of (i) Hydro's generating assets being unavailable
5 and/or (ii) failure of Hydro owned equipment. If Hydro is unable to confirm this,
6 please explain in detail why.

7

8

9 A. Both of the factors cited above played a major role in the capacity constraints
10 experienced in the winter of 2013-2014. However, the coincidence of cold weather
11 conditions at the time of generating asset unavailability also contributed to the
12 capacity constraints experienced.
