

- 1 **Q. (response to CA-NP 238) Please provide rates based on a Hopkinson rate structure**
2 **for General Service Rates 2.2 and 2.3. Provide rates that in NP's view best meet the**
3 **overall rate design objectives under a Hopkinson rate structure and show the rate**
4 **impacts on customers within each class.**
5
- 6 A. Newfoundland Power has not completed the analysis required to determine what rate
7 would best meet the overall rate design objectives under a Hopkinson rate structure for
8 General Service Rates 2.2 and 2.3.
9
- 10 As noted in the response to CA-NP-238, assessment of potential Hopkinson rate
11 structures would require a study that gives due consideration to the overall rate design
12 objectives, including customer considerations.
13
- 14 Completing the rate design and analysis of impacts as requested is not feasible within the
15 timelines provided for responses to requests for information.
