

1 Q. With reference to the Technical Conference on Project B-14 Holyrood
2 Condition Assessment, the \$3.3 million Project Cost is said to be based on a
3 similar assessment project undertaken by another utility. Was the similar
4 assessment project a single-stage, one-year project as is being proposed by
5 Hydro for the Holyrood Condition Assessment, or a multi-stage, multi- year
6 project? Is Hydro aware of any less-costly condition assessment models
7 implemented by other utilities?

8

9

10 A. The study referenced was a one-stage assessment project performed in one
11 year. Hydro is not aware of a less costly condition assessment methodology.
