

1 **B-108 Purchase Pick-Ups and Snowmobiles, \$842,200**

2 Q. How frequently is it anticipated that these vehicles will be used?

3

4

5 A. Frequency will be determined by amount of planned work (Service
6 Extensions, Distribution Upgrading, diesel plant planned maintenance) and
7 unplanned work (breakdown maintenance for the diesel plant or distribution
8 system) in each community. Visits to each of these communities are
9 frequent, usually several times per month and transportation is required to
10 and from the airport, to and from hotel facilities, and on the actual job site for
11 the transportation and handling of materials and personnel. There will also be
12 times when the Diesel System Representative in each community will need
13 the transportation to move heavy parts to and from the airport and diesel
14 plant.
