2 Q. How has NLH dealt with the issue of non-compliance?

3

4

5 A. With reference to the responses to PUB 46.0 NLH and PUB 47.0 NLH, the
6 issue of non-compliance does not exist unless there is a leak or a spill. As
7 part of its Environmental Management Systems, Hydro maintains spill
8 response equipment at this site. However, since this site is not attended on a
9 full time basis, this equipment has limited effectiveness in protecting the
10 environment. This proposal will satisfy Hydro's intent to exercise due
11 diligence by implementing a more permanent and direct measure to protect
12 the environment.
