Subject: Presentation re 2014 Power Outage Inquiry
Importance: High

Please be advised that we represent Nu-Quest Distribution Inc., a pharmaceutical wholesaler located in the Donovan's Industrial Park, Mount Pearl servicing the Island of the Newfoundland and other jurisdictions throughout Canada.

They have retained us to seek to make a presentation on their behalf in relation to the rolling blackouts that occurred with the first two weeks of January 2014. In particular they wish for us to make representations to the Board in relation to the method selected and priorities used to determine which areas would be effected and for how long. They further wish to make representation to the Board as to the effect of the rolling blackouts on their business as well as the potential effects on those reliant upon prescription medication that they supply.

We trust this to be satisfactory and look forward to receiving further direction as to how we can participate in this process on behalf of our client.

Keith Morgan
