Newfoundland Labrador Hydro (NLH) Supply and Demand Status Report Filed Wednesday, September 02, 2015

Section 2 Island Interconnected Supply and Demand						
Wed, Sep 02, 2015 Island System Outlook ³			Seven-Day Forecast	Temperature (°C)		Island System Daily Peak Demand (MW)
				Morning	Evening	Forecast
Available Island System Supply:5	1,205	MW	Wednesday, September 02, 2015	12	12	785
NLH Generation: ⁴	900	MW	Thursday, September 03, 2015	14	18	765
NLH Power Purchases:	115	MW	Friday, September 04, 2015	12	12	770
Other Island Generation:	190	MW	Saturday, September 05, 2015	13	15	735
Current St. John's Temperature:	9	°C	Sunday, September 06, 2015	16	19	750
Current St. John's Windchill:	N/A	°C	Monday, September 07, 2015	18	13	780

7-Day Island Peak Demand Forecast: Supply Notes For September 02, 2015

At 0623 hours, September 2, 2015, Bay d'Espoir Unit 1 unavailable. Previously derated to 45 MW (76.5 MW)

MW

As of 1042 hours, August 31, 2015, Stephenville Gas Turbine unavailable. Previously derated to 30 MW (50 MW).

At 0701 hours, September 2, 2015, Star Lake Unit derated to 12 MW (18 MW).

790

As of 0955 hours, August 27, 2015, Holyrood Unit 3 derated to 70 MW (150 MW).

- 1. Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.
 - 2. Due to the Island Interconnected System being isolated from the larger North American grid, when there is a sudden loss of large generating units some customer's load must be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as underfrequency load shedding, is necessary to ensure the integrity and reliability of system equipment. Underfrequency events typically occur 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes.

Tuesday, September 08, 2015

790

- 3. As of 0800 Hours
- 4. Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).
- 5. Gross output from all Island sources (including Note 4).

Section 3 Island Peak Demand Information Previous Day Actual Peak and Current Day Forecast Peak Tue, Sep 01, 2015 Actual Island Peak Demand 7 16:55 754 MW Wed, Sep 02, 2015 Forecast Island Peak Demand 7 785 MW

Notes: 7. Island Demand is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
