

Newfoundland Labrador Hydro (NLH)

NLH Island Power Purchases: ⁶	120 MW	Sunday, July 29, 2018	19	20	750	750
Other Island Generation:	195 MW	Monday, July 30, 2018	20	21	805	805
ML/LIL Imports:	- MW	Tuesday, July 31, 2018	19	20	805	805
Current St. John's Temperature & Windchill: 20 °C	N/A [°] C	Wednesday, August 01, 2018	20	22	805	805
7-Day Island Peak Demand Forecast:	805 MW	Thursday, August 02, 2018	21	15	785	785
Supply Notes For July 27, 2018 ³						
L At 0652 hours, July 27, 2018, Holyrood Combustion Turbine	unavailable due to pla	nned outage (123.5 MW).				

1. Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system Notes: operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.

2. Due to the Island System having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units some customer's load must be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding, is necessary to ensure the integrity and reliability of system equipment. Under frequency events typically occur 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes.

3. As of 0800 Hours.

4. Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).

5. Gross output from all Island sources (including Note 4).

6. NLH Island Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation, Vale capacity assistance (when applicable).

7. Adjusted for CBPP, Vale and Praxair interruptible load, Maritime Link and Labrador-Island Link exports and the impact of voltage reduction, when applicable.

Island Peak Demand Information Previous Day Actual Peak and Current Day Forecast Peak					
hu, Jul 26, 2018	Actual Island Peak Demand ⁸	12:50	755 MW		
ri, Jul 27, 2018	Forecast Island Peak Demand		800 MW
