

**Newfoundland Labrador Hydro (NLH)**  
**Supply and Demand Status Report Filed Friday, December 28, 2018**

**Section 1**  
**Island Interconnected System Supply, Demand & Exports**  
**Actual 24 Hour System Performance For Sunday, December 23, 2018**

**Supply Notes For December 23, 2018**

A As of 1615 hours, December 19, 2018, Holyrood Unit 1 available at 162 MW (170 MW).

**Section 2**  
**Island Interconnected Supply and Demand**

Mon, Dec 24, 2018	Island System Outlook <sup>3</sup>			Seven-Day Forecast	Temperature (°C)		Island System Daily Peak Demand (MW)	
	Morning	Evening	Forecast		Morning	Evening	Forecast	Adjusted <sup>7</sup>
Available Island System Supply: <sup>5</sup>	2,125	MW		Monday, December 24, 2018	-5	-5	1,470	1,367
NLH Island Generation: <sup>4</sup>	1,685	MW		Tuesday, December 25, 2018	-4	-4	1,470	1,367
NLH Island Power Purchases: <sup>6</sup>	145	MW		Wednesday, December 26, 2018	-6	-6	1,500	1,397
Other Island Generation:	205	MW		Thursday, December 27, 2018	-8	-8	1,575	1,471
ML/LIL Imports:	90	MW		Friday, December 28, 2018	-9	-7	1,590	1,486
Current St. John's Temperature & Windchill:	-5	-13	°C	Saturday, December 29, 2018	-3	2	1,465	1,362
7-Day Island Peak Demand Forecast:	1,625	MW		Sunday, December 30, 2018	-6	-8	1,625	1,520

**Supply Notes For December 24, 2018**

<sup>3</sup>

- Notes:
- Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.
  - Due to the Island system having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units there may be a requirement for some customer's load to be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding (UFLS), is necessary to ensure the integrity and reliability of system equipment. Under frequency events have typically occurred 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes. With the activation of the Maritime Link frequency controller during the winter of 2018, UFLS events have occurred less frequently.
  - As of 0800 Hours.
  - Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).
  - Gross output from all Island sources (including Note 4).
  - NLH Island Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation and capacity assistance (when applicable).
  - Adjusted for curtailable load, market activities and the impact of voltage reduction when applicable.

**Section 3**  
**Island Peak Demand Information**  
**Previous Day Actual Peak and Current Day Forecast Peak**

Sun, Dec 23, 2018	Actual Island Peak Demand <sup>8</sup>	17:35	1,242 MW
Mon, Dec 24, 2018	Forecast Island Peak Demand		1,470 MW

Notes: 8. Island Demand / LIL / ML Exports (where applicable) is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
