## Newfoundland Labrador Hydro (NLH) Supply and Demand Status Report Filed Friday, March 05, 2021

Supply Notes For March 04, 2021

1,2

At 0930 hours, March 04, 2021, Bay d'Espoir Unit 4 unavailable due to planned outage (76.5 MW).

At 1549 hours, March 04, 2021, Bay d'Espoir Unit 4 available (76.5 MW).

## **Section 2**

**Island Interconnected Supply and Demand** 

Fri, Mar 05, 2021	Island System Outloo	k <sup>3</sup>	Seven-Day Forecast	•	erature C)	-	stem Daily and (MW)
				Morning	Evening	Forecast	Adjusted <sup>7</sup>
Available Island System Supply: <sup>5</sup>	2,213	MW	Friday, March 05, 2021	0	0	1,310	1,207
NLH Island Generation: <sup>4</sup>	1,695	MW	Saturday, March 06, 2021	-2	-2	1,225	1,123
NLH Island Power Purchases: <sup>6</sup>	130	MW	Sunday, March 07, 2021	-2	-2	1,280	1,177
Other Island Generation:	235	MW	Monday, March 08, 2021	-5	-4	1,305	1,202
ML/LIL Imports:	153	MW	Tuesday, March 09, 2021	-4	-4	1,290	1,187
Current St. John's Temperature & Windchill:	-2 °C -8	°C	Wednesday, March 10, 2021	-2	0	1,270	1,167
7-Day Island Peak Demand Forecast:	1,310	MW	Thursday, March 11, 2021	1	5	1,195	1,093

## Supply Notes For March 05, 2021

Notes:

- 1. Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.
- 2. Due to the Island system having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units there may be a requirement for some customer's load to be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding (UFLS), is necessary to ensure the integrity and reliability of system equipment. Under frequency events have typically occurred 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes. With the activation of the Maritime Link frequency controller during the winter of 2018, UFLS events have occurred less frequently.
- 3. As of 0800 Hours.
- 4. Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).
- 5. Gross output from all Island sources (including Note 4).
- 6. NLH Island Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation and capacity assistance (when applicable).
- 7. Adjusted for curtailable load, market activities and the impact of voltage reduction when applicable.

Section 3  Island Peak Demand Information  Previous Day Actual Peak and Current Day Forecast Peak							
Thu, Mar 04, 2021	Actual Island Peak Demand <sup>8</sup>	08:35	1,332 MW				
Fri, Mar 05, 2021	Forecast Island Peak Demand		1,310 MW				

Notes: 8. Island Demand / LIL / ML Exports (where applicable) is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
