

## Newfoundland Labrador Hydro (NLH) Supply and Demand Status Report Filed Tuesday, June 14, 2022

### Section 1 Island Interconnected System Supply, Demand & Exports Actual 24 Hour System Performance For Monday, June 13, 2022

#### Supply Notes For June 13, 2022

1,2

- A As of 0857 hours, April 04, 2022, Holyrood Unit 3 unavailable due to planned outage (150 MW).
- B As of 1327 hours, May 08, 2022, Bay d'Espoir Unit 6 unavailable due to planned outage (76.5 MW).
- C As of 2351 hours, May 28, 2022, Holyrood Unit 2 available but not operating 150 MW (170 MW).
- D As of 1317 hours, May 29, 2022, St. Anthony Diesel Plant available at 8.85 MW (9.7 MW).
- E As of 0800 hours, June 08, 2022, Holyrood Unit 1 unavailable due to planned outage (170 MW).

### Section 2 Island Interconnected Supply and Demand

Tue, Jun 14, 2022	Island System Outlook <sup>3</sup>		Seven-Day Forecast	Temperature (°C)		Island System Daily Peak Demand (MW)	
				Morning	Evening	Forecast	Adjusted <sup>7</sup>
Available Island System Supply: <sup>5</sup>	1,375	MW	Tuesday, June 14, 2022	6	4	855	855
NLH Island Generation: <sup>4,8</sup>	1,050	MW	Wednesday, June 15, 2022	6	6	855	855
NLH Island Power Purchases: <sup>6</sup>	105	MW	Thursday, June 16, 2022	8	9	845	845
Other Island Generation:	220	MW	Friday, June 17, 2022	9	9	800	800
ML/LIL Imports:	-	MW	Saturday, June 18, 2022	10	13	765	765
Current St. John's Temperature & Windchill:	3 °C	N/A °C	Sunday, June 19, 2022	14	13	775	775
7-Day Island Peak Demand Forecast:	855	MW	Monday, June 20, 2022	11	12	815	815

#### Supply Notes For June 14, 2022

3

- F At 0750 hours, June 14, 2022, Hinds Lake Unit unavailable due to planned outage (75 MW).

- Notes:
1. Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.
  2. Due to the Island system having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units there may be a requirement for some customer's load to be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding (UFLS), is necessary to ensure the integrity and reliability of system equipment. Under frequency events have typically occurred 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes. With the activation of the Maritime Link frequency controller during the winter of 2018, UFLS events have occurred less frequently.
  3. As of 0800 Hours.
  4. Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).
  5. Gross output from all Island sources (including Note 4).
  6. NLH Island Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation and capacity assistance (when applicable).
  7. Adjusted for curtailable load, market activities and the impact of voltage reduction when applicable.
  8. Due to limitations inherent in the design of combustion turbines, the output of combustion turbines may be reduced in the event that ambient temperatures exceed the threshold

### Section 3 Island Peak Demand Information Previous Day Actual Peak and Current Day Forecast Peak

Mon, Jun 13, 2022	Actual Island Peak Demand <sup>9</sup>	12:10	827 MW
Tue, Jun 14, 2022	Forecast Island Peak Demand		855 MW

- Notes: 9. Island Demand / LIL / ML Exports (where applicable) is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
