

## Newfoundland Labrador Hydro (NLH) Supply and Demand Status Report Filed Tuesday, July 12, 2022

### Section 1 Island Interconnected System Supply, Demand & Exports Actual 24 Hour System Performance For Friday, July 08, 2022

#### Supply Notes For July 08, 2022

1,2

- A As of 0857 hours, April 04, 2022, Holyrood Unit 3 unavailable due to planned outage (150 MW).
- B As of 1327 hours, May 08, 2022, Bay d'Espoir Unit 6 unavailable due to planned outage (76.5 MW).
- C As of 2351 hours, May 28, 2022, Holyrood Unit 2 available but not operating 150 MW (170 MW).
- D As of 0800 hours, June 08, 2022, Holyrood Unit 1 unavailable due to planned outage (170 MW).
- E As of 1422 hours, June 19, 2022, Granite Canal Unit unavailable due to planned outage (40 MW).
- F As of 0210 hours, July 03, 2022, Bay d'Espoir Unit 5 unavailable (76.5 MW).

### Section 2 Island Interconnected Supply and Demand

Sat, Jul 09, 2022	Island System Outlook <sup>3</sup>		Seven-Day Forecast	Temperature (°C)		Island System Daily Peak Demand (MW)	
				Morning	Evening	Forecast	Adjusted <sup>7</sup>
Available Island System Supply: <sup>5</sup>	1,479	MW	Saturday, July 9, 2022	14	15	860	860
NLH Island Generation: <sup>4,8</sup>	1,010	MW	Sunday, July 10, 2022	14	15	875	875
NLH Island Power Purchases: <sup>6</sup>	100	MW	Monday, July 11, 2022	15	17	865	865
Other Island Generation:	220	MW	Tuesday, July 12, 2022	17	17	865	865
ML/LIL Imports:	149	MW	Wednesday, July 13, 2022	18	19	700	700
Current St. John's Temperature & Windchill:	13 °C	N/A	Thursday, July 14, 2022	19	14	705	705
7-Day Island Peak Demand Forecast:	875	MW	Friday, July 15, 2022	12	12	715	715

#### Supply Notes For July 09, 2022

3

- Notes:
1. Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.
  2. Due to the Island system having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units there may be a requirement for some customer's load to be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding (UFLS), is necessary to ensure the integrity and reliability of system equipment. Under frequency events have typically occurred 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes. With the activation of the Maritime Link frequency controller during the winter of 2018, UFLS events have occurred less frequently.
  3. As of 0800 Hours.
  4. Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).
  5. Gross output from all Island sources (including Note 4).
  6. NLH Island Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation and capacity assistance (when applicable).
  7. Adjusted for curtailable load, market activities and the impact of voltage reduction when applicable.
  8. Due to limitations inherent in the design of combustion turbines, the output of combustion turbines may be reduced in the event that ambient temperatures exceed the threshold.

### Section 3 Island Peak Demand Information Previous Day Actual Peak and Current Day Forecast Peak

Fri, Jul 08, 2022	Actual Island Peak Demand <sup>9</sup>	10:35	804 MW
Sat, Jul 09, 2022	Forecast Island Peak Demand		860 MW

- Notes: 9. Island Demand / LIL / ML Exports (where applicable) is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
