

Newfoundland Labrador Hydro (NLH) Supply and Demand Status Report Filed Tuesday, August 02, 2022

Section 1 Island Interconnected System Supply, Demand & Exports Actual 24 Hour System Performance For Monday, August 01, 2022

Supply Notes For August 01, 2022

1,2

- A As of 0857 hours, April 04, 2022, Holyrood Unit 3 unavailable due to planned outage (150 MW).
- B As of 1327 hours, May 08, 2022, Bay d'Espoir Unit 6 unavailable due to planned outage (76.5 MW).
- C As of 0800 hours, June 08, 2022, Holyrood Unit 1 unavailable due to planned outage (170 MW).
- D As of 0210 hours, July 03, 2022, Bay d'Espoir Unit 5 unavailable (76.5 MW).
- E As of 0930 hours, July 12, 2022, Upper Salmon Unit unavailable due to planned outage (84 MW).
- F As of 0800 hours, July 31, 2022, Holyrood Unit 2 unavailable due to planned outage 150 MW (170 MW).

Section 2 Island Interconnected Supply and Demand

Tue, Aug 02, 2022	Island System Outlook ³		Seven-Day Forecast	Temperature (°C)		Island System Daily Peak Demand (MW)	
				Morning	Evening	Forecast	Adjusted ⁷
Available Island System Supply: ⁵	1,498	MW	Tuesday, August 2, 2022	21	21	970	970
NLH Island Generation: ^{4,8}	965	MW	Wednesday, August 3, 2022	20	20	750	750
NLH Island Power Purchases: ⁶	95	MW	Thursday, August 4, 2022	18	19	760	760
Other Island Generation:	210	MW	Friday, August 5, 2022	21	22	755	755
ML/LIL Imports:	228	MW	Saturday, August 6, 2022	18	17	700	700
Current St. John's Temperature & Windchill:	19 °C	N/A	Sunday, August 7, 2022	18	20	720	720
7-Day Island Peak Demand Forecast:	970	MW	Monday, August 8, 2022	21	21	780	780

Supply Notes For August 02, 2022

3

- Notes:
1. Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.
 2. Due to the Island system having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units there may be a requirement for some customer's load to be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding (UFLS), is necessary to ensure the integrity and reliability of system equipment. Under frequency events have typically occurred 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes. With the activation of the Maritime Link frequency controller during the winter of 2018, UFLS events have occurred less frequently.
 3. As of 0800 Hours.
 4. Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).
 5. Gross output from all Island sources (including Note 4).
 6. NLH Island Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation and capacity assistance (when applicable).
 7. Adjusted for curtailable load, market activities and the impact of voltage reduction when applicable.
 8. Due to limitations inherent in the design of combustion turbines, the output of combustion turbines may be reduced in the event that ambient temperatures exceed the threshold.

Section 3 Island Peak Demand Information Previous Day Actual Peak and Current Day Forecast Peak

Mon, Aug 01, 2022	Actual Island Peak Demand ⁹	16:45	948 MW
Tue, Aug 02, 2022	Forecast Island Peak Demand		970 MW

- Notes: 9. Island Demand / LIL / ML Exports (where applicable) is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
