

**Newfoundland Labrador Hydro (NLH)
Supply and Demand Status Report Filed Monday, August 29, 2022**

**Section 1
Island Interconnected System Supply, Demand & Exports
Actual 24 Hour System Performance For Saturday, August 27, 2022**

Supply Notes For August 27, 2022

- A As of 0857 hours, April 04, 2022, Holyrood Unit 3 unavailable due to planned outage (150 MW).
- B As of 1327 hours, May 08, 2022, Bay d'Espoir Unit 6 unavailable due to planned outage (76.5 MW).
- C As of 0800 hours, June 08, 2022, Holyrood Unit 1 unavailable due to planned outage (170 MW).
- D As of 0210 hours, July 03, 2022, Bay d'Espoir Unit 5 unavailable (76.5 MW).
- E As of 0800 hours, July 31, 2022, Holyrood Unit 2 unavailable due to planned outage 150 MW (170 MW).
- F As of 0651 hours, August 22, 2022, Hinds Lake Unit unavailable due to planned outage (75 MW).
- G At 1454 hours, August 27, 2022, Granite Canal Unit available (40 MW).

**Section 2
Island Interconnected Supply and Demand**

Sun, Aug 28, 2022	Island System Outlook ³	Seven-Day Forecast	Temperature (°C)		Island System Daily Peak Demand (MW)	
			Morning	Evening	Forecast	Adjusted ⁷
Available Island System Supply: ⁵	1,394 MW	Sunday, August 28, 2022	15	17	810	810
NLH Island Generation: ^{4,8}	975 MW	Monday, August 29, 2022	18	18	755	755
NLH Island Power Purchases: ⁶	110 MW	Tuesday, August 30, 2022	19	21	765	765
Other Island Generation:	225 MW	Wednesday, August 31, 2022	19	20	750	750
ML/LIL Imports:	84 MW	Thursday, September 1, 2022	19	21	755	755
Current St. John's Temperature & Windchill:	14 °C	Friday, September 2, 2022	19	19	760	760
7-Day Island Peak Demand Forecast:	810 MW	Saturday, September 3, 2022	15	14	695	695

Supply Notes For August 28, 2022

- Notes:
1. Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.
 2. Due to the Island system having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units there may be a requirement for some customer's load to be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding (UFLS), is necessary to ensure the integrity and reliability of system equipment. Under frequency events have typically occurred 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes. With the activation of the Maritime Link frequency controller during the winter of 2018, UFLS events have occurred less frequently.
 3. As of 0800 Hours.
 4. Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).
 5. Gross output from all Island sources (including Note 4).
 6. NLH Island Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation and capacity assistance (when applicable).
 7. Adjusted for curtailable load, market activities and the impact of voltage reduction when applicable.
 8. Due to limitations inherent in the design of combustion turbines, the output of combustion turbines may be reduced in the event that ambient temperatures exceed the threshold

**Section 3
Island Peak Demand Information
Previous Day Actual Peak and Current Day Forecast Peak**

Sat, Aug 27, 2022	Actual Island Peak Demand ⁹	17:00	791 MW
Sun, Aug 28, 2022	Forecast Island Peak Demand		810 MW

Notes: 9. Island Demand / LIL / ML Exports (where applicable) is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
