

Newfoundland Labrador Hydro (NLH)

Supply and Demand Status Report Filed Wednesday, September 07, 2022 (Revised - September 15, 2022)

Section 1

Island Interconnected System Supply, Demand & Exports Actual 24 Hour System Performance For Tuesday, September 06, 2022

Supply Notes For September 06, 2022

1,2

- A As of 1327 hours, May 08, 2022, Bay d'Espoir Unit 6 unavailable due to planned outage (76.5 MW).
- B As of 0800 hours, June 08, 2022, Holyrood Unit 1 unavailable due to planned outage (170 MW).
- C As of 0800 hours, July 31, 2022, Holyrood Unit 2 unavailable due to planned outage 150 MW (170 MW).
- D As of 0651 hours, August 22, 2022, Hinds Lake Unit unavailable due to planned outage (75 MW).
- E **As of 1040 hours, August 27, 2022, Holyrood Unit 3 available but not operating (150 MW).**
- F **At 0728 hours, September 06, 2022, Stephenville Gas Turbine available at 25 MW (50 MW).**

Section 2

Island Interconnected Supply and Demand

Wed, Sep 07, 2022	Island System Outlook ³	Seven-Day Forecast	Temperature (°C)		Island System Daily Peak Demand (MW)	
			Morning	Evening	Forecast	Adjusted ⁷
Available Island System Supply: ⁵	1,315 MW	Wednesday, September 7, 2022	12	12	815	815
NLH Island Generation: ^{4,8}	1,025 MW	Thursday, September 8, 2022	12	11	775	775
NLH Island Power Purchases: ⁶	80 MW	Friday, September 9, 2022	12	12	740	740
Other Island Generation:	210 MW	Saturday, September 10, 2022	13	12	715	715
ML/LIL Imports:	-	Sunday, September 11, 2022	14	14	770	770
Current St. John's Temperature & Windchill:	12 °C	Monday, September 12, 2022	13	12	800	800
7-Day Island Peak Demand Forecast:	815 MW	Tuesday, September 13, 2022	17	18	745	745

Supply Notes For September 07, 2022

3

- Notes:
1. Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.
 2. Due to the Island system having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units there may be a requirement for some customer's load to be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding (UFLS), is necessary to ensure the integrity and reliability of system equipment. Under frequency events have typically occurred 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes. With the activation of the Maritime Link frequency controller during the winter of 2018, UFLS events have occurred less frequently.
 3. As of 0800 Hours.
 4. Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).
 5. Gross output from all Island sources (including Note 4).
 6. NLH Island Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation and capacity assistance (when applicable).
 7. Adjusted for curtailable load, market activities and the impact of voltage reduction when applicable.
 8. Due to limitations inherent in the design of combustion turbines, the output of combustion turbines may be reduced in the event that ambient temperatures exceed the threshold.

Section 3

Island Peak Demand Information Previous Day Actual Peak and Current Day Forecast Peak

Tue, Sep 06, 2022	Actual Island Peak Demand ⁹	17:05	775 MW
Wed, Sep 07, 2022	Forecast Island Peak Demand		815 MW

- Notes: 9. Island Demand / LIL / ML Exports (where applicable) is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
