

Island Interconnected Supply and Demand Temperature **Island System Daily** Sun, Dec 03, 2023 Island System Outlook³ Seven-Day Forecast (°C) Peak Demand (MW) Adjusted⁷ Morning Evening Forecast 1,500 Available Island System Supply:5 1,403 1,921 мw Sunday, December 3, 2023 -1 1 1,485 NLH Island Generation:^{4,8} 1,388 1,360 MW Monday, December 4, 2023 -1 0 1,249 NLH Island Power Purchases:⁶ 1.345 90 MW Tuesday, December 5, 2023 0 1 1.269 Other Island Generation: 205 M/W Wednesday, December 6, 2023 -3 -3 1.365 MW 1,350 1,254 ML/LIL Imports: 266 Thursday, December 7, 2023 -1 0 0 °C °C Current St. John's Temperature & Windchill: 1,370 1.274 -4 Friday, December 8, 2023 0 -2 7-Day Island Peak Demand Forecast: 1,500 MW Saturday, December 9, 2023 -3 -4 1,275 1,180 Supply Notes For December 03, 2023

Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system
operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time
to time equipment outages are necessary and reserves may be impacted.

2. Due to the Island system having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units there may be a requirement for some customer's load to be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding (UFLS), is necessary to ensure the integrity and reliability of system equipment. Under frequency events have typically occurred 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes. With the activation of the Maritime Link frequency controller during the winter of 2018, UFLS events have occurred less frequently.

3. As of 0800 Hours.

4. Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).

5. Gross output from all Island sources (including Note 4).

6. NLH Island Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation and capacity assistance (when applicable).

7. Adjusted for curtailable load, market activities and the impact of voltage reduction when applicable

8. Due to limitations inherent in the design of combustion turbines, the output of combustion turbines may be reduced in the event that ambient temperatures exceed the threshold

Section 3 Island Peak Demand Information Previous Day Actual Peak and Current Day Forecast Peak			
Sat, Dec 02, 2023	Actual Island Peak Demand ⁹	17:05	1,496 MW
Sun, Dec 03, 2023	Forecast Island Peak Demand		1,500 MW
Notes: 9. Island Demand / LIL / ML Exports (where applicable) is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
