Section 2 Island Interconnected System - Supply, Demand & Outlook				
Wed, Feb 04, 2026		Island System Outlook <sup>2</sup>	Seven-Day Forecast	Island System Daily Peak Demand (MW) Forecast <sup>8</sup> Adjusted <sup>6</sup>
Island System Supply: <sup>4</sup>		2,016 MW	Wednesday, February 4, 2026	1,4201,324
NLH Island Generation: <sup>3,7</sup>		1,260 MW	Thursday, February 5, 2026	1,3051,210
NLH Island Power Purchases: <sup>5</sup>		105 MW	Friday, February 6, 2026	1,2751,180
NP and CBPP Owned Generation:		220 MW	Saturday, February 7, 2026	1,3401,245
LIL/ML Net Imports to Island: <sup>9</sup>		431 MW	Sunday, February 8, 2026	1,3351,240
7-Day Island Peak Demand Forecast:		1,465 MW	Monday, February 9, 2026	1,4201,324
			Tuesday, February 10, 2026	1,4651,368
<div>Island Supply Notes For February 04, 2026</div> <div>Notes: <div>1. Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. Hydro schedules outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.</div><div>2. As of 0800 Hours.</div><div>3. Gross continuous unit output.</div><div>4. Gross output from all Island sources (including Note 3).</div><div>5. NLH Island Power Purchases include: ML Imports, Exploits Generation, Rattle Brook, Star Lake, Wind Generation and capacity assistance (when applicable).</div><div>6. Adjusted for interruptible load and the impact of voltage reduction when applicable.</div><div>7. Due to limitations inherent in the design of combustion turbines, the output of combustion turbines may be reduced in the event that ambient temperatures exceed the threshold required for full rated output. This threshold is dependent on the design of each turbine.</div><div>8. Does not include ML Exports.</div><div>9. LIL Import sunk in the Island System. Actual LIL flows will be restricted by various system conditions including, but not limited to, Island Load, ML Exports and Avalon Unit status.</div></div>
