

1 Q. Has Liberty approached Hydro to use its models and data, or is Liberty utilizing its
2 own models and data?

3

4

5 A. As far as Hydro is aware, Liberty's review of the models used by Hydro for load
6 forecasting or generation planning purposes has been limited to their review of the
7 forecasts produced by Hydro using the models, data and assumptions normally
8 used by Hydro's system planning group. Liberty was also provided with a copy of
9 the independent review of Hydro's generation planning and twenty and 5 year load
10 forecasting processes completed by Ventyx in March 2014.
