

1 Q. For the overhead sections of the Labrador-Island Transmission Link, the foundation
2 and anchor quantities have been calculated based upon an assumed distribution of
3 soil conditions (normal% / rock% / bog%). Please provide an explanation of the
4 methodology used by Hydro and if the final design for the foundations will be for
5 the maximum capacity of the structures.

6

7

8 A. Please refer to Hydro's response to CA-NLH-132.
