

1 Q. Please confirm how much of the cables will be trenched instead of buried and if any
2 part of the cables are not trenched or buried.

3

4

5 A. None of the cables will be trenched or buried. The following protection techniques
6 will be used:

7 • Horizontal Directional Drilling (HDD) from Shoal Cove to 70m water
8 depth (2200 m);

9 • Horizontal Directional Drilling (HDD) from Forteau to 75m water depth
10 (1300 m); and

11 • Rock berm protection on seabed (26,500 m).
