

1 Q. Please provide the Report by Hatch *Cold Eye Review of Design and Technical*
2 *Specifications, North Spur Stabilization Works.*

3

4

5 A. The report requested addresses a review of the specifications of the works to be
6 constructed at the North Spur as part of the Lower Churchill Project. As stated in
7 Board Order P.U. 41(2014), at page 15, this proceeding does not involve a technical
8 review of any aspects of the construction of the Muskrat Falls Project and it would
9 not be relevant or useful in this proceeding to require the production of detailed
10 technical information in relation to the North Spur at the Muskrat Falls
11 development.
