

1 Q. **Re: GRK-NLH-003**

2 Preamble: The response to GRK-NLH-002 provides a link to the full text of the  
3 MFPPA, but the response to GRK-NLH-003 does not describe NLH's rights to energy  
4 and capacity under Article 3 of that Agreement.

5 Please provide a concise summary of NLH's rights to energy and capacity under the  
6 MFPPA.

7

8

9 A. A complete description of the rights as articulated in Article 3 of the MFPPA is  
10 required to fully describe Hydro's rights pursuant to the MFPPA. However, in  
11 summary with respect to capacity, Hydro is entitled to the full capacity of the  
12 Muskrat Falls plant, except for the portion required to deliver the Nova Scotia  
13 Block. With respect to energy, Hydro is entitled to three blocks of energy under the  
14 MFPPA:

- 15
- 16 • Base Block Energy: an amount of energy predetermined at the date of  
17 execution of the PPA based on the latest load forecast.
  - 18 • Supplemental Block Energy: an amount of energy available to Hydro if  
19 load requirements exceed the predetermined Base Block Energy.  
20 Supplemental Block Energy will be provided at no additional cost to  
21 Hydro.
  - 22 • Commissioning Period Block Energy: an amount of energy available to  
Hydro during the commissioning period.
