

1 Q. **Re: Table 2.8 (p.30 of Liberty Report)**

2 Please indicate if the MWh savings indicated in the right-hand section of the table
3 are cumulative, or represent year-by-year incremental savings. If the figures
4 provided are incremental, please provide a table indicating cumulative MWh
5 savings, indicating and taking into account the assumed persistence of these savings
6 for the period 2014-2019. If the figures provided are cumulative, please explain why
7 the savings for Windows and Thermostats fell from 2012 to 2013, and why there
8 was no persistence of the very substantial industrial savings achieved in 2012.

9
10

11 A. The MWh energy savings indicated in the right side section of Table 2.8 on page 30
12 of the December 2014 Liberty Report are annual savings achieved in each year by
13 program. The following table is provided to show the cumulative MWh savings for
14 the period 2014 to 2019, taking into account the persistence of the savings based
15 on the effective useful life of the program technologies. These savings include the
16 program participation from 2009 to the end of 2014 and the persistence of the
17 technologies installed from 2009 to 2014. The table does not include any new
18 savings (forecast) beyond 2014.

Island Interconnected System Supply Issues and Power Outages
