

1 Q. Re: GRK-NLH-058

2 Citation:

3 However, in summary with respect to capacity, Hydro is entitled to the full  
4 capacity of the Muskrat Falls plant, except for the portion required to  
5 deliver the Nova Scotia Block.

6 Does the expression "the full capacity of the Muskrat Falls plant" in the citation  
7 refer to a) the full installed capacity of the Muskrat Falls plant (824 MW), at all  
8 times, or b) the full amount of whatever capacity is available from the Muskrat  
9 Falls plant at any given time?

10 If the latter, does the MFPPA provide any commitments to NLH with respect to  
11 the amount of capacity that will *be* available to it at any given time?

12

13

14 A. Pursuant to the Hydro Muskrat Falls Corporation Power Purchase Agreement,  
15 Hydro has contracted the full capacity of the Muskrat Falls plant, less the capacity  
16 associated with the Nova Scotia Block, as per the following definition: "**Contracted**  
17 **Capacity**' means the MF Plant Capacity less the Capacity associated with the NS  
18 Block...".

19

20 Provisions relating to capacity management of the Muskrat Falls plant are  
21 addressed in the Muskrat Falls PPA as referenced in Hydro's response to GRK-NLH-  
22 002. Refer to Article 3 of the Agreement.
