

1 Q. Please provide a list of all jurisdictions which, to Hydro's knowledge, have an  
2 isolated (non-interconnected) power grid. Has Hydro reviewed the reliability and  
3 demand management practices of any of these jurisdictions? If yes, please provide  
4 the information obtained by such review. If no, why not?

5

6

7 A. Hydro has not conducted a formal survey of isolated systems because practices for  
8 isolated systems are unique due to the varying characteristics of the individual  
9 system (e.g., Caribbean island countries, Hawaii, Alaska, and Iceland).

10

11 Please see Hydro's response to CA-NLH-033 for more on Hydro's approach to  
12 reliability standards.
