

1 Q. Please provide the extent the transmission and distribution substations are SCADA
2 controlled and monitored.

3

4

5 A. On the Island Interconnected System, Hydro owns and maintains 52 high voltage
6 terminal stations, operating at 230, 138 and 66/69 kV. Thirty-seven of these
7 stations have SCADA control and monitoring. One station has some monitoring but
8 no control, while 14 stations have no remote control or monitoring.

9

10 On the Island Interconnected System, Hydro owns and maintains 34 distribution
11 systems. Ten of these systems have some level of remote control and monitoring
12 while the remaining 24 have no remote control or monitoring.
