

1 Q. Please provide the numbers of relay and control engineers in the company, and the
 2 numbers of relay technicians working for the company for each of the last five years
 3 by location.

4

5

6 A. The table below provides the number of relay and control engineers and relay
 7 technicians working for Hydro for each of the last five years by location.

8

Job Title	Region/Dept	Location	2009	2010	2011	2012	2013
Protection and Control Engineers	Project Execution and Technical Services	St. John's	10	10	8	8	8
Protection and Control Technologists	Project Execution and Technical Services	St. John's	1	1	1	1	1
Protection and Control Technologists	TROC (Central)	Whitbourne	3	3	3	4	4
		Bishop's Falls	3	3	3	3	3
		Stephenville	2	2	2	2	2
	TRON (Northern)	St. Anthony	2	2	2	2	2

9 Protection and Control personnel in Hydro are not solely dedicated to relay work.

10 Protection and Control would cover, but not be limited to, protective relaying,
 11 control relaying, distributed control systems (DCS), programmable logic control,
 12 governor and excitation systems, metering and UPS systems.
