

1 Q. Please identify any circumstances under which Hydro may curtail service on the  
2 Maritime Link and identify any costs to be borne in doing so.

3

4

5 A. Hydro, as the operator of the NL electricity system, can curtail service on the  
6 Maritime Link for system reliability and other purposes, at no cost to Hydro, as  
7 detailed in Section 10 of the Energy and Capacity Agreement (ECA) (provided in  
8 Hydro's response to PUB-NLH-220). In the event curtailments occur, Nalcor is  
9 obliged to deliver any unsupplied NS block energy at a point in the future prior to  
10 the end of the ECA.
