

1 Q. It is understood that Nalcor will be doing the Horizontal Directional Drilling to the
2 cable manufacturer's specification. Please provide a clear description of the
3 responsibilities and interfaces between Nalcor and the cable manufacturer and
4 cable installer.

5

6

7 A. The Lower Churchill Project and the cable contractor have agreed to a set of
8 parameters to which the Horizontal Directional Drilling boreholes and installed
9 conduits are to be constructed. The cable contractor has agreed to take full
10 responsibility for the installation of the cable, provided the borehole parameters
11 are maintained.

12

13 The borehole trajectory can be measured in real-time and necessary corrections
14 made during the drilling process. As a result, the project team is highly confident
15 the borehole specifications required by the cable installation contractor will be
16 maintained for the cable installation.
