1   Q.   Reference PUB-NLH-265: It is stated that the present UFLS has df/dt settings at

2   0.5Hx/s, 0.6Hz/s and 0.7Hz/s. What will be the range of df/dt when the LIL is in

3   service providing minimum or maximum power to the IIS?

4

5

6   A.   Hydro has not defined the range of df/dt relaying to be employed when the LIL is in

7   service at this point in time. For further details concerning the revised Under

8   Frequency Load Shedding (UFLS) scheme please refer to responses PUB-NLH-535,

9   PUB-NLH-536 and UB-NLH-537.
